

CONSTRUCCION DE LOS CUERPOS DE REVOLUCION

CONO

The diagram illustrates the three vertical projections of a cone. The **V.A.** (vertical anterior) view shows the cone's profile with its apex at the top left and its base on the right. The **V.L. Izq.** (vertical lateral left) view shows the cone's circular base as a circle on the right, with its center labeled **O**. The **V.S.** (vertical superior) view shows the cone's profile from above, with its apex at the bottom left and its base on the right. The center of mass is marked as **O** in the V.L. Izq. view. The drawing uses solid lines for the cone's profile and dashed lines for the center of mass and projection lines.

CONO HORIZONTAL
